

SETAC Reddit AMA disclaimer

*The Society of Environmental Toxicology and Chemistry (SETAC) is hosting the 26th Europe annual meeting from 22–26 May 2016 and has asked experts from across academia, government and industry to answer questions on a wide array of environmental issues. We will have experts across a wide range of environmental science topics, including pesticides, risk assessment, microplastics, nanotechnology, personal care products and pharmaceuticals (in the environment), endocrine disruptors, metals in the environment, environmental disasters (such as oil spills), alternatives to animal testing, science communication and many more. If you have questions about chemicals or toxicants in the environment – we'll try to get you the best possible answers according to the latest science. Please do note that we are asking members of the society who represent researchers from a variety of disciplines and sectors; **the answers are not official SETAC positions**. We encourage discussion and debate! Just please keep it professional.*

For more information on SETAC see <http://www.setac.org>

*Post your question and the organizers of the conference will find someone to answer it as soon as possible. Answers to questions will begin at 2 pm CET (8 am EST, 12 pm UTC, 5am PST) until 6 pm CET (12 pm EST, 4 pm UTC, 9am PST) on **Tuesday 24 May**, with a few breaks.*
