

WHO WE ARE

The Society of Environmental Toxicology and Chemistry is a not-for-profit, global professional organization comprised of some 6,000 members and institutions dedicated to the study, analysis and solution of environmental problems, the management and regulation of natural resources, research and development, and environmental education.

Since 1979, the society has provided a forum where scientists, managers and other professionals exchange information and ideas.

SETAC's founding principles are:

- ▶ Multidisciplinary approaches to solving environmental problems
- ▶ Multi-sector balance among academia, business, government and nonprofit
- ▶ Science-based objectivity

**SETAC is implementing
this mission worldwide.**

SOCIETY OF ENVIRONMENTAL
TOXICOLOGY AND CHEMISTRY

**Advancing Careers.
Building Networks.
Supporting Research.**

CONNECT

SETAC's impressive scientific program has formidable global reach and attracts members from approximately 100 countries. The five geographic units in Africa, Asia/Pacific, Europe, Latin America and North America, together with regional branches and chapters, offer cutting-edge scientific programming anchored by well-attended meetings.

SETAC remains active in significant global initiatives, such as the Strategic Approach to International Chemicals Management, and collaborates with the United Nations Environment Programme and the International Organization for Standardization. The highly visible and successful UNEP/SETAC Life Cycle Initiative has resulted in an expanded relationship with UNEP, and we are now working with the UNEP Global Environmental Facility.
